

	REGE - Norm Packaging specification for suppliers	RN R – 010 07.02.2011 Seite 1 von 1
---	---	--

All deliveries of production material are subject to the following packaging specifications. Conditions stipulated by the supplier as well as deviating agreements will be applicable only if confirmed in written form. Neither the fact that we do not expressly object to an agreement, nor our acceptance or payment of goods shall be construed as an acknowledgement.

Concerning the configuration of the packaging of production materials, the following guidelines have to be attended:

1. Shipping unit is the euro-pallet with the dimensions:
L x W x max. H: 1200 x 800 x 1000 mm
or the skeleton container pallet with the dimensions:
L x W x max. H: 1240 x 835 x 970 mm
2. The gross weight of the shipping unit must not exceed 1000 kg.
3. For multipacks a maximum weight of 15 kg must not be exceeded.
4. For environmental reasons, we prefer reusable packaging. Single-serving packaging can only be accepted in justified particular cases.
5. Cleaning the reusable containers is a duty of the supplier.
6. The packaging has to ensure the delivery of the goods in clean and undamaged conditions. Furthermore, the packaging has to be configured in a way that securely prevents corrosion.
7. Cleanliness requirements of the component drawing must be strictly adhered to.
8. Additional requirements are communicated in the particular case.
9. Every shipping unit must be stackable in the relation of 2 to 1.
10. Every shipping unit has to be provided with a material tag according to VDA 4902 respectively Odette. Furthermore the packaging unit have to be signed in a way that the delivered item and the drawing revision can be identified promptly and clearly.
